EMERGENCY CARE OF OCCUPATIONAL EXPOSURE TO POTENTIALLY INFECTIOUS BODILY FLUIDS[1]

Staff Injury Report Form

EXPOSED HEALTHCARE WORKER'S DETAILS

Surname .....
Name .....
Folder number .....
DOB .....

Date seen: .....
Time seen: .....
Attending clinician: .....
Date of injury: .....
Time of injury: .....

In which department do you work?

.....

What is your position? (e.g. registrar, student nurse, PN, general worker etc.)

.....

Which institution employs you?
(if you are a registrar – e.g. GSH, RXH, NSH; if you are a student – UCT, UWC, Stell, CPUT etc.)

.....

Type of injury (circle): Sharp / Human bite / Scratch / Splash

Specify item (e.g. needle, blade) and whether it was contaminated with body fluid: .....

How and where did the injury happen? Describe the incident and the injury.

.....

.....

.....

.....

What action did you take after the injury occurred?

.....

.....

Other staff present: .....

SOURCE PATIENT DETAILS

SOURCE CASE STICKER

Surname .....
Name .....
Folder number .....
DOB .....

Ward: .....

[1] Use this in conjunction with the Occupational PEP policy document for NSH.

CONSENT FORM FOR OCCUPATIONAL HEALTH ASSESSMENTS

SECTION A – REASON FOR REFERRAL (please tick as appropriate)

1.	Medical surveillance	☐
2.	Fitness certification	☐
3.	Fitness-to-work / return-to-work fitness assessment	☐
4.	Incapacity management	☐
5.	Occupational injury	☐
6.	Occupational disease (e.g. TB, COVID-19, occupational asthma or dermatitis)	☐
7.	Occupational exposure incident (e.g. needlestick, sharps or splash injury)	☐
8.	Other (please state):	☐

SECTION B – EMPLOYEE'S DETAILS

EMPLOYEE LABEL

If unavailable, complete in writing:

Name & surname: .....

DOB: .....

Contact number: .....

Folder number: .....

SECTION C – EMPLOYEE'S CONSENT

The occupational health service routinely captures data on all persons attending this clinic. The purpose of this data collection is for monitoring and evaluation, quality improvement and statutory reporting. Occasionally, this data may be used for research purposes. All data are kept strictly confidential within the occupational health service. Only relevant data are shared with management and legal authorities; and as far as possible, data are anonymised.

I hereby confirm that the purpose of data collection has been explained to me and I consent to its use for the prescribed purpose. I understand that only in rare circumstances, individual or group information may have to be released without my consent, e.g. if the safety of others may be at risk or if required by law.

Employee signature: .....

HCW signature: .....

Date: .....

CHECKLIST FOR INITIAL ATTENDING CLINICIAN (OHS, EC OR NBC) (tick what you have done)

☐ Check that the exposed area has been thoroughly rinsed / irrigated. ***Assess if infectious / non-infectious.***

☐ IF NON-INFECTIOUS EXPOSURE OR INTACT SKIN:*

- PEP is not indicated, no need for bloods or follow-up at OHS
- Only complete COIDA First Medical Report form and report the incident to the matron

☐ IF INFECTIOUS EXPOSURE:

- Give the HCW the first dose of ARVs and the starter pack (unless he/she is *known* to be HIV infected)
  - Give *within 1–2 hours of exposure*. Definitely < 8 hrs. NO benefit > 72 hrs.
  - Time and date given: .....
    Name + signature: .....
    Available at MATRON's office
    - Starter pack contains a 7-day supply of:
      ☐ Tenofovir 300 mg + Lamivudine 300 mg + Dolutegravir 50 mg as fixed-dose combination, 1 tablet once daily PO
- **Has the HCW been immunised against Hep B** (i.e. received minimum 3 vaccines)? (*circle*)
  - Yes, fully Yes, partially No Unknown
  - If yes – date of last booster vaccine or antibody titre check: .....
  - Assess need for HepB prophylaxis (see **table 2**) and administer vaccine/IG if required.
- Ask about pregnancy/lactation/other medication/conditions which might alter PEP choices
  - Counsel about risks and OHS procedure and give information leaflet or policy document.
  - Advise on the need to practise safe sex for the next 3 months.
- Complete forms:
  - Attending clinician to complete: COIDA First Medical Report + this checklist
  - Staff member/student to complete: Staff injury report form and consent form
- Bloods: clinician/phlebotomist take bloods from the **HCW/student** using **STAFF lab request form A**
  - Ensure that bloods have been done on the **source patient** by the phlebotomist/managing team using **SOURCE lab request form B**.
- Give FOLLOW-UP instructions:
  - Staff members and elective students must report to the OHS nurse the following Monday.
  - Students and contract workers must report to the OHS service at their training institution/employer's health provider within 3–7 days.
- Inform the matron-on-duty of the incident

DECIDING ON PEP INTERVENTIONS

1. HIV prophylaxis	**Status of the source**		
	HIV positive	**Unknown**[1]	**HIV negative**[2]
Intact skin *	No PEP	No PEP	No PEP
Splash or percutaneous injury	**3 drugs**	**3 drugs**	No PEP
Percutaneous injury, mucosal splash or non-intact skin exposure to ***non***-infectious bodily fluids *	No PEP	No PEP	No PEP

[1] If subsequent testing reveals the source to be HIV negative, PEP can be stopped. In the event of the source HIV status remaining unknown, the full 28-day course of PEP should be completed.

[2] Only if confirmed on formal HIV ELISA result & the source patient is **not** high risk on questioning.

Potentially HIV-infectious bodily fluids: Blood, CSF, Semen, Vaginal secretions, Synovial fluid, Pleural fluid, Pericardial fluid, Ascitic fluid, Amniotic fluid, Wound secretions, Breast milk, Human bite

* *Non HIV-infectious bodily fluids:* Sweat, Tears, Saliva (BUT if a human bite wound has punctured the skin, PEP should be given), Sputum, Urine, Stool, Vomitus

2. HEPATITIS B PROPHYLAXIS – CIRCLE BLOCK THAT IS APPLICABLE

	SOURCE CASE RESULT	
HCW	**HepBsAg positive or unknown**	**HepBsAg negative**
Not vaccinated	Do HepBsAg HepB **immunoglobulin**[2] within 72 h* (500 iu or 0.06 ml/kg) and repeat in 1 month *plus* HepB **vaccination**[3] 1st dose with repeat doses at month 1–2–6	HepB vaccination[3] 1st dose with repeat doses at month 1–2–6
Vaccinated with known good vaccine response	Nil	Nil
Partially vaccinated	Do HepBsAg HepB **immunoglobulin**[2] within 72 h* (500 iu or 0.06 ml/kg) *plus* HepB **vaccination**[3] stat then complete vaccine course	HepB vaccination[3] stat then complete vaccine course
Vaccinated with unknown or poor vaccine response (HepBsAb titre < 10)	Do HepBsAg HepB **immunoglobulin**[2] within 72 h* (500 iu or 0.06 ml/kg) and repeat in 1 month *plus* HepB **vaccination**[3] 1st dose with repeat doses at month 1–2–6	HepB vaccination[3] 1st dose with repeat doses at month 1–2–6

	HepB immunoglobulin given				**HepB vaccine given**

BLOOD TESTS TO BE DONE ON HCW

Test (see lab form **A** attached)	**Date taken**	**Result**
☐ HIV ELISA		
☐ HepB surface **Antibody** + titre = immunity (if incomplete/unvaccinated also do HepBsAg)		
☐ Hepatitis C antibody		
☐ Creatinine		

BLOOD TESTS[4] TO BE DONE AND INFORMATION NEEDED ON THE SOURCE PATIENT

Test (see lab form **B** attached)	**Date taken**	**Result**
☐ HIV ELISA (if < 18 months do HIV-PCR)		
☐ HepBs**Ag (Antigen)**		
☐ Hepatitis C antibody		
If patient is on HAART:		
☐ Latest HIV viral load		
☐ Current ARVs	AZT D4T TDF ABC 3TC FTC DDI NVP EFV Aluvia Atazanavir DTG	
☐ Previous ARVs	AZT D4T TDF ABC 3TC FTC DDI NVP EFV Aluvia Atazanavir DTG	

[2] Available in Emergency drug cupboard fridge. HBIG 200 iU/2 ml. Adult dose: 500 iU IMI (5 ml). Paediatric dose 0.06 ml/kg IMI.
* Give within 72 hours if HCW's HepBsAg is negative and at risk of possibly contracting Hepatitis B from source.

[3] Available in Emergency drug cupboard fridge. Hepatitis B vaccine 20 mcg/ml. Dose 1 ml IMI.

[4] With informed consent (or superintendent consent as required).

FOLLOW-UP CARE OF OCCUPATIONAL EXPOSURE TO POTENTIALLY INFECTIOUS BODILY FLUIDS

First visit (within 3–7 days) **Date:** .....

- ☐ Containment counselling .....
- ☐ ACTS pre- and post-test counselling .....
- ☐ Results of source patient .....
- ☐ Results of HCW .....
- ☐ Side-effect check .....
- ☐ Drug-interactions check .....
- ☐ Check HepB vaccination schedule .....
- ☐ Encourage safe sexual & work practices .....
- ☐ Offer condoms .....

Follow-up visit (± 2–4 weeks or intercurrent) **Date:** .....

- ☐ Containment counselling .....
- ☐ Side-effect and adherence check .....
- ☐ Give HepB IG & vaccine @ 4 weeks if not immune & source Hep B positive .....
- ☐ ± Repeat creatinine if baseline abnormal .....
- ☐ Repeat FBC if on AZT .....
- ☐ Encourage safe sexual & work practices .....
- ☐ Offer condoms .....

Follow-up visit (6 weeks) **Date:** .....

- ☐ Containment counselling .....
- ☐ Repeat HIV-ELISA .....
- ☐ Repeat creatinine if on TDF .....
- ☐ Repeat FBC if on AZT .....
- ☐ Repeat HepC PCR & Ab if exposed to Hepatitis C .....

Follow-up visit (3 months) **Date:** .....

- ☐ Repeat final HIV-ELISA .....
- ☐ Repeat HepC PCR & Ab if exposed to Hepatitis C .....
- ☐ Encourage safe sexual & work practices .....

Follow-up visit (6 months) **Date:** .....

- ☐ Repeat HepBsAg & HepBsAb titre – if not immune and was at risk of Hep B .....
- ☐ Repeat HepC PCR & Ab if exposed to Hepatitis C .....
- ☐ Encourage safe sexual & work practices .....
